For Immediate Release:

Mustang Dynamometer Gains New Clients While Supporting The Middle East Market

Twinsburg, Ohio, December 16, 2021: Mustang Dynamometer recently exhibited at Automechanika Dubai held at the Dubai World Trade Centre, the largest international trade show for the automotive aftermarket industry in the Middle East. Mustang's purpose was one of commitment and support to its existing customer base while generating new sales and forming new relationships with future clients, expanding its already large presence in the region.

The participation in the expo was better than expected, considering the current difficulties in traveling to the Middle East. "We were very pleased with the turnout to the expo and extremely excited to reunite with our existing customers as well as introducing new customers from the Middle East to the Mustang family," said Eser Manav, Vice President of Operations at Mustang Dynamometer.

With international trade shows, such as Automechanika Dubai, Mustang Dynamometer continues its commitment to offer industry leading accurate, easy-to-use, high performance dynamometers and related products as well as technical support to clients and sales representatives throughout the world.
